

Freestanding mounting system for the installation of photovoltaic panels

System: **W-V3G2-25°**

System description:

Complete support system for fixing three rows of panels in a vertical arrangement

Technical description

Materials of the support system:

MC- Coated structural steel;

Magnelis®, MagiZinc®, PosMAC;

A- Aluminium;

E- Stainless steel;

F- Steel in zinc flake coating.

System tested for strength.

Arrangement of the modules:

· vertical - V

Ground conditions:

· soil with good/high load capacity

System assembly variants:

- W-V3G2 system - rammed into the ground (anchorage depth depends on ground conditions)
- W-V3K2 system - support posts anchored to the concrete foundation
- W-V3B2 system - support posts poured with concrete min. B20 in the holes made in the ground (size of the holes depends on the ground conditions)
- W-V3S2 system - on request, a screw screwed into the ground for fixing of the support post
- W-V3...2-WZ system - east-west option

Warranty:

BAKS provides a 10 year Warranty: period for the components included in the support system - only if all conditions of the manufacturer's Warranty: are met. The Warranty: can be extended.
